

## Milk and Way - Alzheimer's and calf thymus research

As a mid-range and mid-age student of AYUSH the author had an average understanding of Homeopathy. His paternal uncle and his avuncular brother are in this stream. While approaching the trials of modern medicine the author joined several conferences and webinars on portals of Allopathy such as Lecturio. In Ayurveda and Siddha the concepts are intuitive to the Sanskrit eye. In Homeopathy and Allopathy, toiling in the true state requires Latin and Greek. Although the author had a good grasp, things were not easy due to his bent towards Semitic studies over and beyond these languages - in Aramaic, Coptic and Slavic et cetera.

Homeopathy can thus utilize the most important development in the big malaise of modern post-Coronavirus society in Alzheimer's today. While heart diseases and Diabetes remain the top killers, it is nerve problems that afflict the uninitiated populace through the digital and electromagnetic pollutants that disburse the urban lifestyle.

The key to depth in the root of Alzheimer's, Parkinson's and Dementia are the same - the brain and not the casuistry nerve shakes. The nerves if controlled correctly, scoped from the Acetaldehyde aspect of the microsystems of cellular biology, can be controlled by the use of a compound that breaks the blood-brain barrier. Tissue from Calf Thymus. Now if we apply Homeopathic principles the Hujjat, as it is called in Unani of why modern society's love of alcohol especially in the West is causing nerve diseases can be controlled by use of its essence or pattern only. And no animal harm will come. Since cows are worshipped throughout India, this can be a political ammunition for its advocacy. As cow and its derivative compounds can easily and surely be used to help Diabetic and Heart patients - by use of live cows for modifying the Circadian rhythms. These are easy, non-surgical means and the starch that is responsible for this toothy problem of Diabetes and Heart can be controlled easily in a retiring, rural setting for the patients. And the formation of further blocks in Heart diseases, Diabetic insulin recovery and Alzheimer's by a easy to prey on Saffron theory of the mother cow can be successful despite the Marxist narratives that abound in the Unani world as opposed to the Ayurveda, Siddha, Tibb and Homeopathy practitioners as per the empirical observance of the author.
